

WAAS

Water as a Service

A subscription-based model
for optimised water treatment

WATER TECHNOLOGIES

 **VEOLIA**

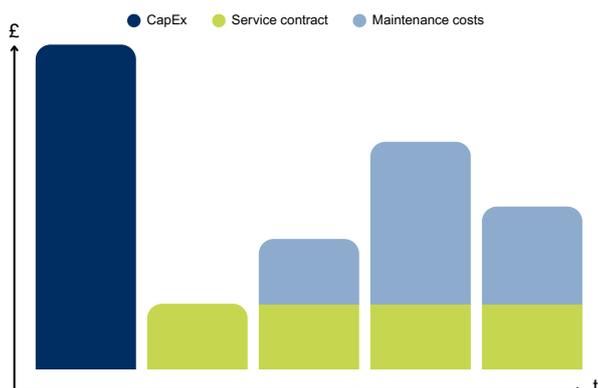

WaaS: a new approach to water management for laboratories and industries

Water is critical for operations across labs, industries, and pharmaceutical facilities. Whether it's for scientific protocols, industrial processes, or drug manufacturing, ensuring a consistent supply of high-quality water is essential. However, managing and maintaining water treatment equipment can be costly and time-consuming.

Water-as-a-Service (WaaS) by Veolia Water Technologies is a comprehensive, subscription-based model that simplifies water management for your business. WaaS enables you to shift from large capital expenditures (CapEx) to predictable operating expenses (OpEx), optimising your cash flow while ensuring reliable water quality.

With WaaS, Veolia assumes full responsibility for your water treatment system, providing long-term service agreements and advanced monitoring, allowing you to focus on your core operations.

Without WaaS

Benefits

No capital expenditure (CapEx)

Pay only for the water you use, while Veolia owns and maintains the system.

Guaranteed continuity

WaaS ensures uptime and reliability to meet the specific water needs of each sector.

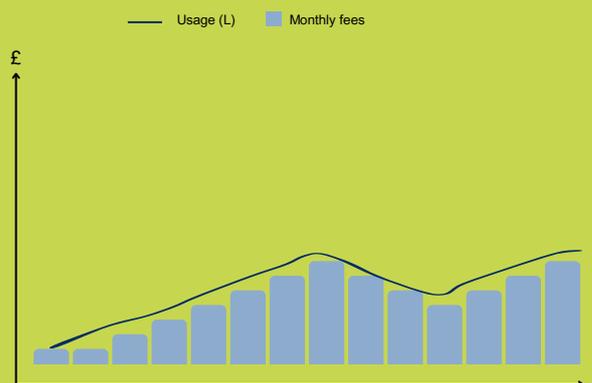

Predictive and preventive

Minimise downtime with predictive analytics that foresee maintenance needs.

Scalable flexibility

WaaS evolves with your changing water requirements, whether expanding or downsizing.

With WaaS

How does WaaS work?

Tailored contract

- Water quality, quantity, demand profile, etc.
- The right Veolia technologies to meet your needs.
- Price per volume based on expected usage.

Installation & Commissioning

- From compact lab solutions to full-scale industrial systems.
- Veolia owns the equipment and assumes the operational risk.
- You still own the pipework, accessories and fixtures.

Worry-free water purification

- System connected to our secure digital platform (Hubgrade™).
- Monthly billing based on actual consumption.
- Veolia handles all risks, optimisation, and maintenance.
